** The excise tax on aircraft jet fuel is not subject to an annual adjustment.

How are the sales and use tax prepayment rates determined?

We calculate the prepayment rate for each gallon of gasoline, aircraft jet fuel, and diesel fuel at 80 percent of the combined state and local sales tax on the average selling price of the fuel, excluding sales tax, as reported by industry publications. We are required to establish the sales tax prepayment rates by March 1 of each year.¹ We may continue to adjust these rates during the year if changes in fuel prices cause fuel retailers to prepay too much or too little tax.

How are the excise tax rates determined?

We are required to adjust the motor vehicle fuel² and diesel fuel³ excise tax rates on July 1 of each year, based on the percentage change in the California Consumer Price Index, as calculated by the Department of Finance.
