How are the sales tax prepayment rates determined?

The prepayment rate for each gallon of gasoline, aircraft jet fuel, and diesel fuel is calculated at 80 percent of the combined state and local sales tax on the average selling price of the fuel, excluding sales tax, as reported by industry publications. By March 1 of each year, the CDTFA is required to establish the sales tax prepayment rates. The CDTFA may adjust these rates during the year if changes in fuel prices cause fuel retailers to prepay too much or too little tax. The CDTFA will notify you by special notice if this occurs.
